About the company

Loop Secure is Australia's longest-standing cybersecurity firm with over 30 years history in the region. We are a leader in cybersecurity services, with 24x7 security operations, expert adversary simulation & penetration testing capabilities along with leading governance, risk and compliance consulting. Loop offers a competitive salary package with flexible work/life balance within a fun working environment.

About the role

Loop Offensive Security Services (OSS) Security Consultants are experienced penetration testers who bring their technical expertise, consulting, and leadership skills to the team.

The role will function within the OSS operating model and a service-oriented customer engagement model, supporting the delivery of various OSS capability areas. The role must be well-versed in all aspects of offensive security (penetration testing) methodologies, as well as have a clear understanding of how security controls apply within the overall context of business risk.

The role performs control assurance exercises and other requests from the business, including but not limited to:

- Penetration Testing of web apps, mobile apps, internal and external infrastructure;
- Social Engineering engagements;
- Simulated Phishing campaigns;
- Physical Intrusion testing; and
- Adversary Simulation (Red Teaming)

Within the role you will:

- Perform customer-focused delivery work on a daily basis
- Draft customer-focused penetration test reports with minimal errors or inconsistencies
- Quality Assess (QA) customer-focused reports written by other consultants, mainly from a technical perspective

Our culture and values

Loop focuses heavily on our culture and values to create an enjoyable working environment that recognises the best in our Loopies:

- We look for client success in everything we do,
- We strive for continual improvement, challenging the status quo and searching out opportunities to learn, grow and lead for ourselves and the business,
- Dependability is highly valued, when we say we are going to do something, we follow it through,
- Having fun is a big focus for us, calling out and recognising Loopies bringing enjoyment and laughter to our work day,
- Loopies focus on teamwork, working together to achieve our goals and helping out when someone is in need. We are always looking to share our ideas, thoughts and feelings,
- We take the initiative to get things done even when no one is watching. Being pro-active is an important part of being on the 'Loop Bus'.

About the candidate

For this role we value candidates with the following behaviours:

- Strong interpersonal skills
- Detail-oriented
- Excellent written and verbal communicator
- Team player
- Works well independently
- Achievement-oriented
- Open to learning
- Persistent

The role will suit a security professional with:

- 1 - 5 years of experience working independently on penetration testing
- Experience effectively delivering small to medium engagements.
- 1 - 5 years working experience with internal/external penetration testing methodology
- 1 - 5 years working experience with web application or mobile application penetration testing methodology
- Knowledge and effective use of Windows Active Directory attack techniques
- Knowledge and effective use of cloud platform attack techniques
- Knowledge and effective use of Linux attack techniques
- Knowledge and effective use of web/mobile application attack techniques

The qualifications we expect the candidate to have include industry-related education:

- Practical training in at least one penetration testing discipline (minimum 40 hrs course).
- Minimum 1 security cert. e.g. GPEN, GWAPT, GMOB, GXPEN, GCPN, OSCP, OSWE, OSEP, OSEE, CREST, CISSP.
